

DIDHEEMOSE SEBASTIAN

Software Engineer (Full-Stack & Cloud)

sebastiandidheemose2002@gmail.com | +353 899516047 | Dublin, Ireland | Stamp 1G (Full Work Rights) | [LinkedIn Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with an MSc in Cloud Computing and hands-on expertise building production-grade web applications, RESTful APIs, and automated cloud infrastructure. Combines modern full-stack development (Node.js, React, Python) with containerized operations and CI/CD automation (Terraform, GitHub Actions, AWS).

SKILLS

Languages & Frameworks: Python, Node.js, React.js, Next.js, FastAPI, REST APIs, gRPC
Cloud & Infrastructure: AWS (ECS Fargate, EKS, RDS, VPC, S3, CloudWatch, SSM), Terraform, Kubernetes, Docker
Databases & Telemetry: PostgreSQL, MongoDB, CloudWatch Insights, Prometheus, Grafana, Connection Pooling
CI/CD & Security: GitHub Actions, MLflow, Flower, Git, cPanel, JWT Authentication, mTLS / EC Security

PROFESSIONAL EXPERIENCE

Full Stack Engineer, Accurate Software Solutions Feb 2023 - Mar 2024 · Kochi, India

- Implemented JWT authentication, rate-limiting, and request validation to secure client systems against high-concurrency spikes.
- Configured connection pooling, server-side caching, and query optimization to accelerate data retrieval and minimize latency.
- Developed modular front-end components and integrated them with RESTful APIs to accelerate feature delivery.

Cloud & Infrastructure Engineer (Freelance), Studd Games Jun 2026 - Aug 2026 · Remote

- Engineered GitHub Actions workflows to deploy code directly to cPanel hosting, establishing a reliable deployment pipeline.
- Architected a Git branching model and dedicated staging environment to isolate testing prior to production releases.
- Resolved critical Cloudflare/cPanel DNS conflicts and refactored UI layouts for responsive mobile performance.

Facility Operations Coordinator, Samsic Facility Ireland Jul 2024 - Present · Dublin, Ireland

- Managed daily facility operations, safety compliance, and urgent issues while finishing a full-time Master's degree.

PROJECTS

Cursus LMS - Automated Cloud Platform & Serverless Infrastructure · Terraform, ECS Fargate, Docker, GitHub Actions, CloudWatch [Project Link](#)

- Provisioned multi-tier AWS environments (ECS Fargate, private subnets, security groups) using Terraform with zero manual configuration.
- Configured a 3-stage GitHub Actions workflow separating infrastructure code, application delivery, and database migrations.
- Implemented dynamic secret injection via AWS SSM and configured CloudWatch Container Insights with SNS alarms.

CloudShield-Federated: Zero-Trust Cross-Silo MLOps Platform · Kubernetes, Flower, Envoy Gateway, FastAPI, PyTorch, MLflow, Prometheus, Grafana, Docker Compose, mTLS

⊕ [Project Link](#)

- Deployed a cross-silo platform hosting Flower SuperLink and MLflow in Kubernetes, orchestrating external edge nodes via Docker Compose.
- Configured Envoy Gateway for TLS re-encryption and enforced Elliptic Curve (prime256v1) key-pair authentication on SuperLink.
- Built a Kubernetes-deployed FastAPI prediction service using async lifespans, Pydantic validation, and vectorized PyTorch data loaders that cut training iteration overhead by 15x.

EDUCATION

MSc, Cloud Computing, National College of Ireland	Mar 2024 - Apr 2025 · Dublin, Ireland
Bachelor's Degree, Computer Applications, University of Calicut	Jun 2020 - Jan 2023 · Kerala, India

PUBLICATIONS

Self-Adaptive Federated Learning System for Financial Fraud Detection, https://norma.ncirl.ie/8133/	Jan 2025
